

Solid Waste Facility Permit

1. Local Facility No:

SWIS No. 32-AA-0009

2. Name and Street Address
of Facility:

Chester Landfill
County Road #322
Chester, CA

3. Name and Mailing Address of
Operator:

County of Plumas
1824 E. Main Street
Quincy, CA 95971

4. Name and Mailing Address of
Owner:

Roseburg Resources Company
P.O. Box 680
Weed, CA 96094

Section 36, T29N, R7E, MDBM

5. Permitted Operations: The following operations, as defined by the California Code of Regulations, Title 14 and/or Title 27, are authorized by this permit:

- ☒ Solid Waste Disposal Site
☐ Transfer Station (Large Volume / Limited Volume / Sealed Container/ Contaminated Soil)
☐ Composting (Mixed Waste / Sludge / Green Material)
☐ Contaminated Soil Monofill
☐ Other _____

6. Approval

Approving Officer Signature

Doug Ames, Director of Environmental Health
Name/Title

7. Approval dates:

Date received by CIWMB: **MAR 29 2000**

CIWMB Concurrence Date: **MAY 23 2000**

LEA Permit Issuance Date: **JUN 01 2000**

8. Local Enforcement Agency Name and
Address:

Lassen, Modoc, Plumas and Sierra Counties LEA
Lassen County Health Department
555 Hospital Lane
Susanville, CA 96130

9. Operator/Owner Transfer Date:

10. Site Boundary and Disposal Area Description: (reference to attachment)

County Road 322, off State Hwy 36
E1/2, E1/2, Section 36, T29N, R7E, and W1/2, W1/2, Section 31, T29N, R8E, MDB&M
(See March 1999 JTD, Figure A-1)

Solid Waste Facility Permit

Chester Landfill

Local Facility No:

SWIS No. 32-AA-0009

11. LEA Findings

- a. The permit is consistent with the Plumas County Integrated Waste Management Plan, PRC, Section 50001.
- b. This permit is consistent with the standards adopted by the CIWMB. (PRC 44010)
- c. Based on a review of the March 1999 Joint Technical Document and monthly inspections of the facility, the design and operation of the facility is consistent with State Minimum Standards for Solid Waste Handling and Disposal.
- d. The LEA finds that the Mitigated Negative Declaration, SCH# 2000022050, dated March 29, 2000, describes and supports the design and operation which will be authorized by the issuance of this permit. The MND, SCH# 2000022050, was prepared by the Lassen, Modoc, Plumas and Sierra Counties Solid Waste Local Enforcement Agency. The MND was adopted on March 29, 2000 and the Notice of Determination was filed with the State Clearinghouse on that date.

12. Facility Limitations: The operator shall not exceed the following limitations:

- a. Daily Tonnage: N/A (tons per day or other)
(See Item 13.a. and endnote #17.a.)
- b. Permitted Hours of Operation: Daylight Hours/NA (operating hours/public hours)
(see end note #17.b.)
- c. Permitted Maximum Elevation (MSL): 5131 (feet above/below mean sea level))
- d. Permitted Minimum Excavation (MSL): 5085 (feet above/below mean sea level)
- e. Maximum Permitted Traffic: NA (vehicle trips/total vehicle entering)
(See end note #17.c.)
- f. Maximum Permitted Acreage: 40 (acres)
- g. Maximum Permitted Disposal Area: 27.8 (acres)

Chester Landfill

Local Facility No:

SWIS No. 32-AA-0009

13. Design Information

At the time the permit was prepared, the following basic design information was reviewed and was fundamental in setting the conditions in this permit, as were the details of the design information provided in the JTD. The operator shall keep all information updated pursuant to Title 27, Sec. 21600. Such amendments or lack thereof may become the basis for changes in the permit. The information listed below is in no way meant to set limits on the facility. However, the LEA may determine that if the following design significantly changes, the operator will be required to revise the permit to include additional or different conditions or limitations.

- a. Facility Tonnage: In full operations, the landfill will receive approximately 16,000 tons per year of solid waste generated from the unincorporated area of Plumas County. This is equivalent to an average daily throughput, on an annual basis, of approximately 44 tons per day of solid waste.
- b. Total Remaining Airspace: 399,000 (cubic yards waste and cover)
- c. Estimated Closure Year (landfill): 2024

14. The following is a list of some of the other permits and other necessary documents for the facility, which the LEA has reviewed and considered prior to writing the permit. These documents in no way condition the facility under this Solid Waste Facility Permit, unless otherwise stated in the LEA Condition portion of this permit.

Documents	Date
Preliminary Closure/Post Closure	<u>March 1999</u>
Closure Financial Responsibility Document	<u>11-22-94</u>
	<u>10-7-98</u>
	<u>3-15-99</u>
Operating Liability	<u>3-24-98</u>
Conditional Use Permit	<u>NA</u>
Waste Discharge Requirements	<u>11-2-90</u>
Air Pollution Control District Permits	<u>10-17-95</u>

Solid Waste Facility Permit

Chester Landfill

Local Facility No:

SWIS No. 32-AA-0009

15. LEA Monitoring Requirements:

Program	Reporting Frequency	Agency Reported To
Tonnage and Records:	Annual	Maintain in files
Remaining Capacity:	Annual	Maintain in files

16. LEA Conditions

- The March 1999 JTD and subsequent approved JTD Amendments shall reflect the current operation at this facility. The operator must file amendments to the JTD at least 30 days prior to making changes in the design and operation from those outlined in the JTD. Any significant changes must be filed at least 150 days prior to making the changes. Such JTD Amendments or lack thereof may become the basis for changes in the permit or for revocation of the permit.
- The operator shall notify the LEA within 24 hours of commencement of emergency disposal operations.
- The operator shall notify the LEA at least 30 days prior to commencement of full MSW disposal operations. An amendment to the JTD must be submitted to the LEA at that time describing operations under the scenario to assure compliance with the State Minimum Standards, particularly spreading, compaction and cover requirements.

17. End Notes

- As described in the JTD, this permit covers two scenarios. The first scenario is a limited operations consisting of emergency MSW disposal of approximately 4 days per year at an average of 50 cubic yards per day for a total of approximately 200 cubic yards per year, and approximately 500 cubic yards of C&D type wastes per year. The rest of the

County's MSW will be transported to the Lockwood Landfill in Nevada. This is well within any limits established by this or previous permits.

The second scenario is a full county MSW landfill operation as the only remaining landfill for Plumas County should something happen to the long haul of waste to Lockwood. In this scenario, approximately 44 tons of waste per day on an annual average will go to the Chester Landfill until another practicable alternative can be acquired. There is no maximum tonnage for this landfill, as it receives only waste from Plumas County, all waste comes through the existing transfer stations, and the landfill can handle any maximum waste that could be generated within the county without any problems. A significant increase in the average daily tonnage will result in enforcement action, CEQA review, and/or revision of the Solid Waste Facility Permit.

- b. Hours of operation shall be daylight hours. Plumas County Public Works and the contract/franchise transfer station operator (currently Feather River Disposal/Waste Management) will have the only access the landfill. The landfill will not be open to the public.
- d. Traffic will only be approximately 5 trucks per day. No maximum traffic has been established. However, the landfill and mile long access road could handle any traffic generated within the County.
